The objective of the Fund is to safeguard the Fund's ability to continue as a going concern so that it can continue to provide optimum returns to its unit holders and to ensure reasonable safety to unit holders.

The Fund manages its investment portfolio and other assets by monitoring the return on net assets and makes adjustments to its investment policy in the light of changes in market conditions. The capital available is dependent upon the issuance and redemption of units.

For the six months period ended 30 June (Saudi Riyals '000')

#### 8. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

#### 8.1 Credit risk

Credit risk is a risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

The Fund is exposed to credit risk on its cash and cash equivalents and investments held to maturity. The Fund Manager seeks to limit its credit risk by monitoring credit exposures, setting limits and dealing with individual counterparties with sound credit ratings.

#### 8.2 Profit rate risk

Profit rate risk arises from the possibility that changes in market profit rate will affect future returns or the fair value of the Murabaha contracts.

The Financial assets of the Fund are not exposed to profit rate risk as murabaha investments are held to maturity and are entered for short term at fixed rates of profit.

#### 8.3 Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in realizing funds to meet commitments associated with financial liabilities and payment towards units redeemed. Liquidity risk may result from the inability to sell a financial asset quickly at an amount close to its fair value.

The Fund's terms and conditions provide for the subscription and redemption of units on every valuation day and it is, therefore, exposed to the liquidity risk of meeting redemptions at any time. The Fund's securities are considered to be readily realisable and they can be liquidated at any time. However, the Fund Manager has established certain liquidity guidelines for the Fund and monitors liquidity requirements on a regular basis to ensure sufficient funds are available to meet any commitments as they arise.

#### 8.4 Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to a change in foreign exchange rates.

All the financial instruments of the Fund are denominated in Saudi Riyals and hence, the Fund is not exposed to currency risk.

#### 9. FAIR VALUES OF FINANCIAL INSTRUMENTS

Fair value is the amount for which an asset could be exchanged, or a liability settled between knowledgeable willing parties in an arm's length transaction. Financial instruments comprise financial assets and financial liabilities.

The Fund's financial assets consist of cash and cash equivalents, investments held to maturity and its financial liabilities consist of accrued expenses. Management believes that fair values of these instruments are not materially different from their carrying values.

#### 10. LAST VALUATION DATE

The last valuation date of the period was 30 June 2012 (2011; 30 June 2011).
